***BECOME A PARTNER OF THE***

# **FUTURE FOREST FORUM**

**6TH + 7TH SEPTEMBER 2024**

***WWW.FUTUREFOREST.DE***

## Why should you support us?

The **FUTURE FOREST INITIATIVE** considers itself to be a sustainability innovation hub in which the challenges of forests in the face of climate change are proactively identified and sustainable solutions are developed.

For this purpose, we combine various core elements to create a dynamic innovation ecosystem. The basis is a unique **community** of start-ups, forest ownership, entrepreneurship, science and investors that benefit from and complement each other through networking and projects. Central implementation components are the startup **accelerator**, in which innovations are identified across Europe and accelerated through customised formats, as well as **pilot projects** in which innovations are tested and scaled in and with practice.

However, the centrepiece is our annual event, the **FUTURE FOREST FORUM**, which has developed into Germany's most important event for innovations in the context of forests and the environment within two years.

The 4th Future Forest Forum will take place on 6 and 7 September 2024 at the Great Castle in Blankenburg (Harz). We are once again expecting well over 350 participants from all target groups. Through keynotes, start-up pitches, workshops and excursions, we will provide inspiring impulses for innovation and use new matching formats to connect our participants with suitable implementation partners in a targeted manner.

We would like to win you as a partner of the fourth Future Forest Forum and have therefore created the following **three partner packages**, enabling you to establish yourself as a supporter of the forest of tomorrow.

Please do not hesitate to contact us if you have any individual questions!

# RECAP FORUM 2023

**350** INNOVATORS
